

## Indian Oil Corporation Limited

September 17, 2025

Facilities	Amount (₹ crore)	Ratings <sup>1</sup>	Rating Action
Long Term Bank Facilities	2,317.00	CARE AAA; Stable	Reaffirmed
Long term / Short Term Bank Facilities	9,164.00 (Reduced from 10,012.00)	CARE AAA; Stable / CARE A1+	Reaffirmed
Short Term Bank Facilities	46,269.00 (Enhanced from 45,421.00)	CARE A1+	Reaffirmed

Details of facilities in Annexure-1.

### Rationale and key rating drivers

Ratings assigned to bank facilities of Indian Oil Corporation Limited (IOCL) continue to derive strength from its strong parentage being a Maharatna Central Public Sector Enterprise (CPSE) controlled by the Government of India (GoI) and its high strategic importance to the GoI.

Ratings also factor in the company's leadership position in domestic oil refining and marketing business characterised by largest refining capacity of 80.75 million metric tonne per annum (MMTPA) as on March 31, 2025 (consolidated), and domestic sales of petroleum products, gas and petrochemicals of 95.37 MMT in FY25 (refers to April 01 to March 31). IOCL's strong operational profile is supported by presence across hydrocarbon value chain, broad based marketing and distribution network, and superior processing capabilities of its refineries as reflected by high Nelson Complexity Index (NCI) in many of its refineries. Ratings also take note of moderation in financial performance in FY25, from exceptionally high level in FY24, due to moderation in gross refining margins (GRMs), significant under recovery in LPG segment, and reduction in retail price of petrol and diesel by ₹2/litre implemented from mid-March 2024. In Q1FY26, the financial performance improved y-o-y due to significant reduction in LPG under recovery, and lower crude oil prices, against stable retail fuel prices. Overall, the financial performance is likely to remain healthy in the medium term, supported by healthy compensation for LPG under-recoveries announced by the GoI, moderate GRM, range-bound crude oil prices, and stable retail fuel prices.

While most of the capital expenditure in FY25 was funded through debt, the company continues to maintain a comfortable financial risk profile.

However, rating strengths are tempered by inherent vulnerability of the company's profits to volatility in crack spreads and foreign exchange fluctuations, apart from project implementation risks due to sizeable capital expenditure (capex) plans and susceptibility to inherent regulatory risks.

### Rating sensitivities: Factors likely to lead to rating actions

#### Positive factors

- Not applicable

#### Negative factors

- Dilution in GoI's stake in IOCL to less than 50% or reduction in its strategic importance to GoI.
- Sustained weakening of operational performance, marked by lower throughputs and GRMs.

#### Analytical approach: Consolidated

For arriving at ratings, CARE Ratings Limited (CareEdge Ratings) has considered IOCL's consolidated financials, owing to the strong financial and operational linkages between IOCL and its subsidiaries/associates/joint ventures. Ratings have been notched up for the GoI ownership considering high strategic and economic importance of IOCL to the GoI. The list of companies considered in the consolidation is placed at Annexure-6.

#### Outlook: Stable

The 'Stable' outlook on ratings reflect that the entity is likely to benefit from its leadership position in crude oil refining and retailing business underpinning its strategic importance to the GoI, which should help to maintain its strong credit profile.

<sup>1</sup>Complete definition of ratings assigned are available at [www.careratings.com](http://www.careratings.com) and other CARE Ratings Limited's publications.

**Detailed description of key rating drivers:****Key strengths****Strong parentage and strategic importance to the GoI**

IOCL is majority owned by the GoI (51.50% as on June 30, 2025) and is strategically important to the GoI for achieving its socio-economic goals. Oil marketing companies (OMCs) have a dominant position in the domestic market for key petroleum products such as high-speed diesel (HSD), motor spirit (MS), superior kerosene oil (SKO) and liquefied petroleum gas (LPG). OMCs serve critical policy functions for the supply of fuel throughout the country, and these companies have been consistently supported by the GoI by absorbing a good portion of their sales-related under-recoveries through subsidies. Due to increasing LPG under recoveries, the GoI announced an aggregate compensation of ₹30,000 crore to three public sector OMCs in 12 tranches. IOCL is likely to continue benefiting from the government support, given its strategic significance.

**Leadership position and presence across hydrocarbon value chain**

IOCL has presence across the hydrocarbon value chain, which includes exploration, refining, marketing, transportation (pipeline) and petrochemical, with dominant market position in most segments. Having integrated operations reduces underperformance risk in a particular segment.

At a consolidated level, IOCL has 11 major refineries across the country. Consolidated refining capacity of 80.75 MMTPA makes it the largest player among oil refining companies in India. IOCL is also India's largest OMC, with a standalone domestic sales volume of over 95.37 MMT in FY25 and a retail market share of ~40%-45% in HSD, MS and LPG in FY25.

With 40,666 retail outlets as on June 30, 2025 (37,472 retail outlets as on March 31, 2024), IOCL has the largest marketing set up in the country for selling petroleum products. In LPG as well, IOCL had a market share of 45.23% in FY25 and a network of over 12,924 distributors and 101 LPG bottling plants across the country with a domestic customer base of ~15.50 crore connections as on June 30, 2025.

IOCL also has presence in the upstream exploration and production business, with ownership of 14 domestic and 11 overseas assets, of which, nine are currently producing as on March 31, 2025.

**Established network of pipeline**

IOCL operates a network of over 20,004 km long crude oil, petroleum product and gas pipelines with a throughput capacity of 129.90 MMTPA of oil and 49.33 million metric standard cubic meters per day of gas (MMSCMD). IOCL's liquid pipelines achieved a throughput of 96.92 MMT (95.80 MMT in FY24), comprising ~51 MMT of crude and ~46 MMT of petroleum products in FY25. Gas pipelines witnessed throughput of ~4,668 MMSCM (3717 MMSCM in FY24) in FY25. These cross-country pipelines are cost-effective and energy-efficient mode for transportation of crude oil and petroleum products.

**Healthy financial performance despite moderation in FY25**

The capacity utilisation for the company's refineries (overall) has consistently remained high and above 95% in the last four fiscals (100% in the last two years ended FY24), indicating strong operating efficiency. Some of its refineries have high NCI among the public sector refineries in India, which enables it to process heavy oil and oil of APIs with high quality.

In FY25, the GRMs declined to US\$ 4.80 per barrel from US\$ 12.05 per barrel, primarily due to a narrowing discount on the Russian crude basket and weaker product cracks. While this moderation in GRM impacted profitability, further pressure arose from significant under-recoveries in the LPG segment and a ₹2/litre reduction in retail prices of petrol and diesel implemented from mid-March 2024.

In Q1FY26, the overall profit before interest, lease rentals, depreciation, and taxation (PBILDT) improved due to significant reduction in LPG under recovery aided by upward revision in prices by ₹50 per cylinder, improved product cracks and stable retail fuel prices.

Overall, healthy compensation for LPG under-recoveries announced by the GoI, range-bound crude oil prices, stable retail fuel prices, and potentially lower LPG sourcing costs are expected to support profitability in the near-to-medium term.

**Comfortable financial risk profile**

IOCL's financial risk profile continues to remain healthy with overall gearing ratio of 0.82x as on March 31, 2025 (0.72x as on March 31, 2024). The slight moderation is considering increased debt levels to fund its large capex.

Debt coverage indicators also moderated slightly marked by total debt to gross cash accrual (TD/GCA) of 4.74x as on March 31, 2025, against 2.20x as on March 31, 2024, but remained satisfactory. Interest coverage also moderated to 3.81x in FY25 against 9.53x in FY24. Going forward, the overall gearing is expected to remain comfortable despite large size capex plan, considering strong net worth base and scheduled repayment of debt.

**Liquidity: Strong**

Being a GoI promoted entity, IOCL enjoys strong financial flexibility. Access to low-cost funds from domestic and overseas market further enhances its financial flexibility.

As on March 31, 2025, IOCL had ₹13,375 crore cash and liquid investments and non-current investments of ₹32,876 crore (having majorly quoted equity shares in ONGC [CARE AAA; Stable/ CARE A1+], GAIL [India] Limited and Oil India Limited [rated CARE AAA; Stable/ CARE A1+]), which provides additional comfort to its liquidity.

The company had undrawn working capital limits of ~₹38,341 crore as on March 31, 2025, and its internal accruals are expected to be sufficient to meet its debt repayment obligations of ~₹13,000-16,000 crore per annum in the next three years. For capex requirement, the company plans to avail debt on need basis. IOCL also derives strong financial flexibility from its parentage of GoI, apart from its strong market position, which provides it easy access to funds at attractive rates and aids funding of its capex partially through debt on need basis. The company generated healthy cash flow from operations of ~₹32,000 crore in FY25, and its operating cycle remained comfortable below 41 days in the last three fiscals ended FY25.

**Key weaknesses****Sizeable capex plans**

IOCL is executing projects of varying scales with cumulative project cost of over ₹2.6 lakh crore spread over 160 projects. In FY25, the company incurred capex of ~₹40,000 crore. It is expected to incur capex of ~₹34,000-36,000 crore per annum at a consolidated level over the next 2-3 years, of which, majority is likely towards enhancing capacity of its refineries. As on June 30, 2025, the refinery capex was ~60% complete (in terms of financial completion) with Panipat Refinery and Gujarat Refinery scheduled for commencement of operations in December 2025 (for the increased capacity).

In addition to the above, company has sizeable capex plans in renewable energy segment (through entities such as Terra Clean Limited and IndianOil NTPC Green Energy Pvt Ltd) and a petrochemical greenfield project in Paradip (with estimated cost of ₹61,000 crore).

**Exposure to volatility in crack spreads and foreign exchange rates**

Crude oil prices and crack spreads are a function of many dynamic markets and fundamental factors, such as the global demand-supply dynamics, geopolitical stability in countries with oil reserves, policies of the Organization of the Petroleum Exporting Countries (OPEC) and foreign exchange rates, among others. These factors have translated to high level of volatility in oil prices and cracks. Being an oil refining and marketing company, pricing of major petroleum products naturally hedge crude purchase prices to a large extent. The company's profitability is exposed to volatility of crack spreads, and foreign exchange fluctuations.

**Regulatory risk**

GoI's policy and decisions considering finished product pricing, subsidy sharing, windfall taxes, duties, cess, and dividend payments can have a significant bearing on IOCL's profitability, cash flows and liquidity position. In elevated prices of crude, the GoI may choose to pass on fiscal burden by sharing profits of PSUs through higher fiscal levies, higher dividend declaration, or providing discounts to OMCs, which has the potential to impact IOCL's income and accruals. Refiners are required to comply with increasingly stringent product specifications (such as equivalent of Bharat Stage VI) as stipulated by regulators.

**Industry outlook**

In FY26, OMCs are expected to experience lower refining margins due to a weak global demand scenario for end products, whereas their fuel retailing margins are expected to expand due to lower crude oil prices, while pump prices remain largely stable. LPG under-recoveries are also expected to decline materially in FY26, following the recent price hike per cylinder and lower LPG sourcing cost. Announcement of compensation for LPG under recoveries is also expected to boost OMCs profitability. While Brent crude oil prices are expected to remain volatile due to geopolitical tensions globally, overall profitability for OMCs are expected to be healthy in the near term.

## Environment, social, and governance (ESG) risks

Risk Factors	Compliance and action by company
<b>Environmental</b>	<ul style="list-style-type: none"> <li>IOCL has been increasing its presence in alternative/renewable energy space with increasing capacity and infrastructure. IOCL has renewable energy (RE) portfolio of 247 MW as of March 2024, which includes 168 MW of wind and 79 MW of Solar. It is targeting to increase its RE portfolio towards meeting net zero commitments. IOCL commissioned 4,656 EV charging stations in FY25, increasing the total to 13,614 EV charging stations.</li> <li>IOCL planted over seven lakh trees in FY25 and also invested ~₹56 crore in tree plantation projects across 21 sites in four states under Green Credit Program (GCP).</li> <li>IOCL's business is inherently prone to oil spills/leakage due to the complex and high-risk nature of its operations. These spills can occur in drilling, transportation, or storage. While the company has faced many oil leakage/spill issues over the years, the company has been making efforts to curb these incidents through technological advancements and other measures.</li> </ul>
<b>Social</b>	<ul style="list-style-type: none"> <li>The company has a good track record of customer grievance redressal.</li> <li>Gender diversity remained in line with industry peers with women employees forming ~9% of the total workforce in FY25.</li> <li>The company had total CSR budget of ₹539.17 crore in FY25 against which ₹583.04 crore was spent largely in health and sanitation, promotion of national heritage, art and culture and GCP.</li> </ul>
<b>Governance</b>	<ul style="list-style-type: none"> <li>IOCL's composition of the board of directors was not in conformity with Listing Regulations, Companies Act, 2013 due to absence of adequate number of independent directors on the company's board (in April 01, 2024, to May 07, 2024, and May 11, 2024, to August 31, 2024, and November 13, 2024, to March 31, 2025), and absence of at least one woman independent director (as per the annual report for 2024-25). However, the company has no direct control towards appointment of these directors, who are appointed through government (by the concerned Administrative Ministries/ Departments).</li> <li>IOCL has healthy investor grievance redressal and extensive disclosures. The board also has a government-nominated director. In FY25, no whistle blower complaints were received by the company.</li> </ul>

### About us:

Established in 1993, CareEdge Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the Reserve Bank of India. With an equitable position in the Indian capital market, CareEdge Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CareEdge Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CareEdge Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.
